

Mending Kids International provides life-changing surgical care to children worldwide. Over the years, thousands of children have received corrective, transformational surgeries that have given them another chance at a longer, healthier life. Most of the surgeries performed are for congenital heart defects, orthopedic abnormalities, severe scoliosis and significant cranial facial deformities.

MKI has provided surgeries to hundreds of children from all over the globe. In the past five years, 500 children from 39 countries have received life-saving surgeries.

The Folsom Police Canine Association recently donated our German Shepard stuffed animals and Challenge Coins to the nurses of the most recent trip to Ecuador. The nurses handed out the stuffed dogs and coins to the kids after their heroic heart surgeries were completed. A lot of these kids have never had a stuffed animal and the joy that the toys brought to the kids was tremendous. We were honored to be a part of the healing process of the children. The stuffed dogs and coins are bought through donations to our association.
